SAFE Boats International unveils new Multi-Mission Interceptor (MMI) at the Multi-Agency Craft Conference

Baltimore, MD (June 8, 2016): SAFE Boats International (SBI), a manufacturer of high performance aluminum boats located in Bremerton, Washington unveiled a new model, the Multi-Mission Interceptor (MMI), at the Multi-Agency Craft Conference (MACC) on June 8, 2016.

Designed around SAFE Boats proven, commercially available Interceptor family, the 35-foot MMI has a maximum speed of 55+ knots and is capable of high speed open-ocean transits, extreme velocity maneuvers and unmatched cornering performance in close proximity to other vessels. A unique integrated SHOX TRAXS mounting system allows the operator to rapidly configure the aft deck to accommodate a variety of mission-specific payloads.

Built with the user in mind, it is an incredibly safe platform with outstanding performance, sea keeping and multi-mission capabilities. The MMI also carries the latest in innovation from SAFE Boats' distinguished supplier partners such as Mercury, FLIR, Raymarine, SHOXS, Boatmaster, David Clark, Soft Deck, HyperSpike and Weldon.

“We are excited to launch the Multi-Mission Interceptor, one of the most versatile and highest performing models in our already great portfolio”, commented Dennis Morris, Chief Executive Officer. “We engaged our customers to understand their current and emerging requirements and designed a platform that gives them true multi-mission capability in a single platform.”

About SAFE Boats International

SAFE Boats International is an industry leading aluminum boat manufacturer and a global leader in providing the most reliable and effective boat platform systems and solutions to defense, security, and first responder customers to accomplish their missions.

MISSION CRITICAL, PERFORMANCE DRIVEN.

Designed from a mature, proven, commercially available Interceptor family, the SAFE 35 Interceptor is a dogfighting machine capable of high velocity maneuvers and incredible cornering performance in close proximity to other vessels as well as high speed, open ocean transits.

Ergonomic features maximize efficiency and enhance ease of movement around the craft. An integrated SHOX TRAXS mounting system allows the operator to rapidly configure the aft deck of the SAFE 35 Interceptor to accommodate a variety of mission-specific payloads. The vessel operates at top speeds in the harshest seas and features an open T-Top built to maximize visibility in all situations. The SAFE 35 Interceptor is an incredibly safe working platform with outstanding performance, sea keeping and multi-mission capabilities.

With over 2000 vessels manufactured and over 5 million hours in the field without a hull failure, SAFE Boats International is the leader in design, production and support of uniquely capable, durable, high performance patrol and response craft and has proudly served the U.S. military and our allies since 1997.

*All specifications are dependent upon final mission configuration.*
MISSION PROFILES

- Maritime Border Protection and Port Security
- Coastal Patrol
- Alien Migrant Interdiction
- Search and Rescue (SAR)
- Smuggling Interdiction
- Special Operations
Open T-Top design provides 360° view

Ergonomically designed helm with navigation suite

Secured gun storage

Patented foam collar system

Raised debarking platform

Optional gun mount foundations
RECONFIGURABLE DECK SYSTEM

An integrated SHOXS TRAXS mounting system is fitted to the aft deck allowing the operator to configure the craft to meet mission requirements. The track system is fitted at uniform spacing throughout the craft and provides a secure mechanism for attaching seat bases and any specialized equipment racks or cargo which allows for rapid reconfiguration and convertibility.

The MMI can be rapidly reconfigured to meet a variety of roles, including:
- Boarding and Interdiction
- Fire support integration of mounted weapon systems
- Command and control integration of communications equipment
- Advanced interdiction and high risk boarding
- Search and Rescue
- Medical Evacuation
- Law enforcement use

Standard Patrol

*Over 5,000 lbs (2,268 kg) capacity of secured equipment/cargo transport

Advanced Interdiction*

*Up to 14 shock mitigated seats

Standard Patrol – Cargo*

Dive

*Up to 10 seated dive personnel and tanks

U.S. Federal Customers
**COMMUNICATIONS**

**David Clark**

The Series 9100 Digital Intercom Marine Communication System provides clear communication despite high winds and engine noise for mission-critical, crew-to-crew communications. System components, including headsets, headset stations and belt stations are built for all-weather, work-ready reliability. Noise attenuating headsets feature PTT switch conveniently located on headset boom easy to find and actuate in the most stressful situations. Digital technology provides high-performance versatility with wired security and wireless mobility for crew members.

**AVAILABLE SUBSYSTEMS**

**PROPULSION**

**Mercury**

The SAFE 35 Interceptor is configurable with Mercury Verado® outboard engines. Engineered to provide the best all-around driving experience, Mercury Verado has become synonymous with supercharged power and torque; industry-leading performance, fuel economy and handling; true power steering, and minimized noise and vibration.

**SAFETY & SECURITY**

**HyperSpike**

With the proprietary HyperSpike® technology, the HS-14 is a self-contained, lightweight, portable acoustic hailer for communicating long distances and penetrating high background noise environments.

**Soft-Deck**

Soft-Deck’s High-Performance, Energy-Absorbing Flooring System (HPEAFS) is a revolutionary, light weight, shock mitigating decking system that is designed to reduce the likelihood of injury, and fatigue to operators and passengers on high speed craft by absorbing vibration and mitigating the impact felt as a result of pounding at high speed.

*All subsystems listed above are notional options. Other options are available. Speak with your representative for more information.*
NAVIGATION

**Raymarine**

An optional Raymarine navigation suite offers both the coxswain and navigator access to key functions such as radar and GPS plotting. Raymarine multifunction displays also provide access to depth, Blue Force AIS and camera information for enhanced situational awareness. Raymarine’s Evolution™ autopilot greatly reduces crew fatigue on long runs and increases fuel economy.

**SENSORS**

**FLIR**

Sensor options for the SAFE 35 Interceptor include the FLIR M618CS, FLIR M400 or SeaFLIR 230. FLIR’s gyro-stabilized multi-sensor imaging systems are unmatched in providing high performance day and night imaging in a small lightweight package.

**SEATING**

**SHOXS**

The SAFE 35 Interceptor seating package consists of SHOXS Shock Mitigating Seating. Every SHOXS seat is precision manufactured for engineered ride stabilization and superior ergonomics. Made to exceptional standards, SHOXS are purpose built for specific environments and usage scenarios.

![SHOXS 6800 Series](image) ![SHOXS 5600/5700 Series](image)

**TRAILERING**

**Boatmaster®**

Boatmaster’s SB33-180 custom transport system for the MMI was engineered, designed, and tested for use in extraordinary environmental and unusual terrain conditions. Rated for 18,000 GVW, this unit is air/sea transportable, highway capable and designed to transport the vessel to any destination.
